

Trump's So-Called Liberation Day Might Have Been True And Freedom IF Pointing To Actual Liberation And Freedom Original Thought From Each Position

Kevin A. Sensenig Draft 1.05 2025 April 28 – May 2

Liberation Day might have been a freedom thing and base (but wasn't) and on January 30, 2025 (but wasn't). Not by the Trump Administration at all. But IF it would have been what I propose herein.... Take 10 days to set up, from Inauguration Day, with things in place, and deploy by impenetrable logic, Revolutionary Common Sense, original, of and interpreted by each person, group, and culture, respected by Federal-State Concert; -- that is, Revolutionary Common Sense is available to and of and protected for everyone. Each interpreting and extending it per his or her own viewpoint and culture. And what it is and its why – original elements of Thomas Paine's original-thought Thesis (in Rights Of Man, An American Crisis, Common Sense, the following: 1) freedom, 2) rights, 3) representation, 4) religion, 5) private property (or, maybe in modern terms, right to a freedom and true resource and there and present *dwelling and its associated property*), 6) commerce to benefit, manifest ability, and know each other across nations and cultures ... and his detailed etched logic and esprit) -- emphasized and enunciated from the Administration, and from each of us, and our groups and cultural standpoints and cultures, in the United States.

This then as stated herein (and NOT as carried out at all, Jan 20 thru to April 28), would have enhanced (and still could) the best of federal law and processes, leaving federal intact and enhanced, with new feedback loops for certain federal design and applications and regulations, the people to federal to the people renewed – simple added functionality per MAGA-2.6-

TrueOriginalPerIndividualAndWorkgroupAndCulture!; and federal-States Concert, and weeds out or recasts the any if detriment – all at the original and applied interpretation of each federal worker in place, management, and the people. It can then only enhance, be enhanced, be interpreted, promote to discourse many initiative ideas and equilibria and change, or freedom-rearrange any logic, and in a just and intelligent and true to original from all sides, and compassionate manner – now available (IF it would have been and we can still do it this way despite inverted world crude directives that are AGAINST a true original of we all the people with each his or her original applied interpretation as in herein) and overtly protected for each person, group, and culture in the United States. Then, acknowledging and working with the viewpoint and culture and democracy unique to each nation.

This then could be factored in the qualitative life of the individual in an interval that Georg Lukacs stated. And help to refine and enhance some unique-to-USA elements of Marxist thought, particular to the American Experience and culture(s), leaving most of the Marxist elements, the fundamentals, and the framework intact, and the sense of what I'll term combinatorial equality, in the United States Of America USA, and enhance them or restate them in uniquely American Freedom Liberation (true liberation true to the term and its historical meaning) terms that are dialogic, etched, and the usual dialectic formats and logic – all original in its time and contextual arrangement.
